Subject Index: Volume 37, 2004

Ablation
in right posterior paraseptal accessory pathway, 75
Activation mapping
using unipolar basket catheters, 1
Acute coronary syndrome. *See* **Coronary artery disease**
Acute myocardial infarction. *See* **Myocardial infarction**
Alternans
bundle branch block during atrial fibrillation, 67
Amiodarone
postoperative P-wave variables and, 127
Arrhythmias. *See also specific arrhythmias*
persistent Brugada-type ECG pattern in octogenarian, 109
of sudden traumatic death, 227
Atrial conduction delay
after cardiothoracic surgery, 127
Atrial fibrillation
postoperative, prediction of, 127
RR-interval dynamics in, 207
Autonomic nervous system
in chronic heart failure, effect of postural position on, 201
repeatability of heart rate variability measures, 163
sleep apnea syndrome and, 31
AV block
with bradycardia, in-hospital VF and, 55

Basket catheter recordings
vs. balloon recordings, 1
Bradycardia
predictors of in-hospital VF and TdP in, 55
QT prolongation, psychotropic drug therapy and, 267
Brugada syndrome
with atypical ECG, 101, 105
during exercise treadmill test, 231
persistent without clinical symptoms, 109
Bundle branch block
on alternate beats during atrial fibrillation, 67

Calcium channel inactivation
verapamil-induced conversion of VF to VT and, 89
Cardiac asystole
primary idiopathic, 105
Cardiac resynchronization
spontaneous, 133
Cardiac toxicity
drug development research and, 19
Cardiothoracic surgery
postoperative P-wave variables after, 127
Catheterization laboratory
ECG for decision support in, 247, 257
Central venous catheter
saline-filled, for intracardiac electrocardiography, 83
Chronic thromboembolic pulmonary hypertension
ECG signs of right ventricular overload in, 219
Circadian variation
in heart rate turbulence, 297
Clinical research
design, for drug development, 25
electrocardiography role in, 19
Concealed conduction
of right bundle branch block, 67
Coronary artery disease
circadian variations in, 297
ECG for decision-making in, 247
exercise-induced ST deviation, ST-recovery loop of, 275
reproducibility of HF QRS morphology and, 289
sleep apnea syndrome and, 31
CR leads
reproducibility of HF QRS morphology and, 289

Death, sudden
atypical Brugada syndrome and, 105
Holter monitoring of arrhythmias during, 227
Decision support
in catheterization laboratory, ECG for, 247, 257
Decubitus position
reduction of QT dispersion in chronic heart failure, 201
Device interaction
between ICDs and radiotherapy, 73
Differential diagnosis
of acute myocardial infarction, 135
Drug development
clinical research design for, 25
electrocardiogram role in, 19
Drug safety
electrocardiographic assessment of, 19, 25

Elderly
persistent Brugada-type ECG without clinical symptoms, 109

Electrical restart
of ICD during radiotherapy, 73
Electrocardiography
for decision support in catheterization laboratory, 247, 257
evaluation of postoperative P-wave variables, 127
in grading ischemia, 149
manual *vs.* automatic repolarization measurements, 181
role in clinical research and drug development, 19
of RVO in pulmonary embolism, 219
13th multiuse leads for, 285
12-lead, reconstruction of, 11
Electrophysiology
differentiation of posterior paraseptal accessory pathways, 75
Endocardial mapping
basket *vs.* balloon recordings, 1
Essential hypertension
sleep apnea syndrome and, 31
Exercise testing
giant R wave, convex ST-segment elevation and negative T wave during, 231
rate-dependent QRS prolongation during, 241
ST deviation and ST-recovery loop in identifying CAD, 275
transient R-wave enhancement and ST-segment elevation during, 121

Far-field electrograms
in diagnosing QT prolongation and torsades de pointes, 237
Fibrillation. *See* **Atrial fibrillation; Ventricular fibrillation**
Focal conduction block
exercise-induced, 121
Frontal ECG leads
lead minus aVR and, 141

Giant R wave syndrome
during exercise treadmill test, 61, 121, 231
Grades of ischemia
electrocardiogram-derived, 149

Heart disease, ischemic. *See* **Ischemia**
Heart failure
reduction of QT dispersion in, 201
Heart rate
QT prolongation, psychotropic drug therapy and, 267
Heart rate turbulence
circadian changes in, 297
ventricular premature beat and, 41
Heart rate variability
circadian variation in, 297
measures, repeatability of, 163
in pregnancy, 47
sleep apnea syndrome and, 31
High-frequency ECG
in ischemic heart disease, 157
QRS signals, reproducibility of, 289
Holter monitoring
during sudden traumatic death, 227
Hyperkalemia
rate-dependent QRS prolongation during exercise testing, 241
Hypertension
chronic thromboembolic pulmonary, 219
sleep apnea syndrome in, 31
Hypertrophic cardiomyopathy
QT variability in, 113

Implantable cardioverter defibrillator
far-field electrograms in TdP and QT prolongation diagnosis, 237
malfunction during radiotherapy, 73
Intracardiac electrocardiography
via saline-filed central venous catheter ECG lead, 83
Intraventricular conduction delay
during exercise treadmill testing, 61
Ischemia
ECG-derived ischemia grading, 149
exercise-induced, hyperkalemia and, 241
high-frequency ECG in, 157
reproducibility of high frequency QRS recordings and, 289

Kurtosis
reproducibility in high frequency QRS recordings, 289

Lambda wave
sudden cardiac death and, 105
Leads
exercise-triggered transient R-wave enhancement and ST-segment elevation in, 121
orderly frontal lead display and lead minus aVR, 141
reconstruction, accuracy of, 11
reproducibility of HF QRS morphology and, 289
saline-filled central venous catheter, 83
13th multiuse, 285
Left bundle branch block
in AMI, differential diagnosis of, 135
spontaneous cardiac resynchronization and, 133
Linking phenomenon
during atrial fibrillation, 67

Malfunction
of ICD during radiotherapy, 73
Mexiletine
rate-dependent QRS prolongation during exercise testing and, 241
Multifocal atrial tachycardia
intracardiac ECG via saline ECG lead, 83
Multivariate analysis
in identifying coronary artery disease, 275

Myocardial infarction
complexity of dynamic QT variablity and RR variability in, 173
diagnosis, 13th multiuse ECG lead for, 285
differential diagnosis of, 135
ECG for risk stratification, 257
old, sleep apnea syndrome and, 31
Myocardial ischemia. *See* **Ischemia**

Oxygen saturation
sleep apnea syndrome and, 31

Pacemakers
ST-segment elevation without AMI, 135
Pacing
postoperative P-wave variables and, 127
Panoramic lead display
lead minus aVR and, 141
Patient monitoring
in reconstructing 12-lead electrocardiogram, 11
Percutaneous coronary intervention
interior ST elevation myocardial infarction, 257
Pointwise correlation dimension
in acute myocardial infarction, 173
Posterior paraseptal accessory pathway
algorithm for differentiating, 75
Pregnancy
new-onset ventricular arrhythmias in, 47
Prinzmetal angina
during exercise treadmill test, 231
Proarrhythmia
psychotropic drug therapy and, 267
Psychotropic drugs
abnormal QT prolongation and, 267
Pulmonary embolism
electrocardiographic signs of RVO in, 219
P waves
evaluation after cardiothoracic surgery, 127
intracardiac ECG via saline ECG lead, 83

QRS complex
amplitude, in basket *vs.* balloon recordings, 1
plasticity during ischemia, 121
QRS duration
postural position and, 201
rate-dependent prolongation during exercise testing, 241
QRS signals
high-frequency ECG, reproducibility of, 289
QRS-ST complex
"action-potential-like," sudden cardiac death and, 105
QT dispersion
in chronic heart failure, recumbent position and, 201
sleep apnea syndrome and, 31
in ventricular ectopic beats, 181
QT interval
prediction of VF or TdP in hospitalized bradycardia patients, 55
in pregnancy, 47
variability, in hypertrophic cardiomyopathy, 113
in ventricular ectopic beats, 181
QT interval prolongation
abnormal, psychotropic drug therapy and, 267
in drug safety assessment, 19, 25
retrospective diagnosis by ICD electrogram analysis, 237
QT-RR intervals
in acute anterior wall myocardial infarction, 173
in pregnancy, 47
QT variability
in acute myocardial infarction, 173
in hypertrophic cardiomyopathy, 113

Radiotherapy
ICD malfunction during, 73
Reduced amplitude zone
reproducibility of HF QRS morphology and, 289
Reliability
of heart rate variability measures, 163
Repolarization
effect of premature ventricular beats on, 181
quantification in acute myocardial infarction, 173
transmural dispersion, ventricular tachyarrhythmias and, 191
Reproducibility
of heart rate variability measures, 163
of high-frequency QRS ECG signals, 289
Right-atrial electrocardiography
saline-filled lead for, 83
Right-axis deviation
during treadmill testing, 61
Right bundle branch block alternans
during atrial fibrillation, 67
Right ventricular outflow tract
idiopathic ventricular tachycardia in pregnancy, 47
Right ventricular overload
ECG signs in pulmonary embolism, CTEPH diagnosis and, 219
Risk stratification
in catheterization laboratory, ECG for, 247, 257
Root mean square voltage
reproducibility in high frequency QRS recordings, 289
R-peak voltages
in basket *vs.* balloon recordings, 1
RR-interval plotting
in atrial fibrillation, 207

Sclarovsky-Birnbaum Ischemia Grading System
refinement and interobserver agreement for, 149
Sleep apnea syndrome
in hypertension and coronary artery disease, 31
Stratification
in catheterization laboratory, ECG for, 247, 257
ST-recovery loop
of exercise-induced ST deviation in CAD, 275

ST segment
depression, in acute coronary syndrome, 247
exercise-induced deviation, ST-recovery loop of, 275
ST-segment elevation
convex, during exercise treadmill test, 231
in diagnosing AMI in ventricular paced rhythm, 135
downsloping in inferior leads, 101
during exercise treadmill testing, 121
inferior, ECG for risk stratification for, 257
persistent Brugada-type ECG pattern without clinical symptoms, 109
Sudden cardiac death
atypical Brugada syndrome and, 105
Sudden traumatic death
Holter monitoring of arrhythmias during, 227
Supernormal conduction
of right bundle branch block, 67
Supraventricular tachycardia
differentiation of posterior paraseptal accessory pathway, 75
Swan-Ganz catheter
for intracardiac electrocardiography, 83
Syncope
abnormal QT interval variability in HCM and, 113

Tachycardia
multifocal atrial, 83
supraventricular, differentiation of posterior paraseptal accessory pathway and, 75
ventricular. *See* **Ventricular tachycardia**
Thrombolysis
ST-segment elevation in ventricular paced rhythm, 135
Torsades de pointes
in-hospital prediction in bradycardia patients, 55
psychotropic drug therapy and, 267
retrospective diagnosis by ICD electrogram analysis, 237
Transmural dispersion of repolarization
ventricular tachyarrhythmias and, 191
Traumatic death, sudden
arrhythmias of, 227
T wave
negative, during exercise treadmill test, 231
prediction of ventricular tachyarrhythmias, 191

Unipolar electrograms
properties of, 1

Variant angina
giant R wave, RAD and IVCD during treadmill testing, 61
Ventricular arrhythmias. *See also specific ventricular arrhythmias*
circadian variation in, 297
RR-interval dynamics in AF-patients and, 207
Ventricular fibrillation
in-hospital prediction in bradycardia patients, 55
transmural dispersion of repolarization and, 191
verapamil-induced conversion to VT, 89
Ventricular premature beats
heart rate turbulence and, 41
Ventricular premature complex
spontaneous cardiac resynchronization and, 133
Ventricular premature contractions
new-onset, in pregnancy, 47
RR-interval dynamics in, 207
Ventricular tachycardia
new-onset, in pregnancy, 47
postinfarction, exit-site localization of, 1
transmural dispersion of repolarization and, 191
verapamil-induced conversion from VF, 89
Ventriculoatrial interval
in differentiating paraseptal accessory pathway, 75
Verapamil-induced conversion
of VF to VT, 89
VT/VF transition
spectral and correlation analyses of, 89
